

Programme Educational Objectives (PEOs):

Graduates are expected to attain Program Educational Objectives within three to four years after the graduation. Following PEOs of Department of Civil Engineering have been laid down based on the needs of the programs constituencies:

PEO1: To impart science-based engineering education and professional skills that will prepare the students for contributing to the development of civil engineering projects being undertaken by either Public or Private sectors.

PEO2: To develop human potential to its fullest extent so that our students can pursue higher education and contribute to teaching, research and development of civil engineering and related field.

PEO3: To develop among students the ability to be registered with engineering professional bodies and to work with other professionals and fit into social settings.

PEO4: To prepare students towards achieving excellence in engineering decision-making and design,

PEO5: To develop human potential to its fullest extent so that intellectually capable and imaginatively gifted leaders can emerge in engineering practice.

PEO6: To develop a global view among students so that they can appreciate diversity in the world and in intellectual pursuits and the desire and ability to keep learning throughout life.
